SUMMARY

A highly motivated and detail-oriented Computer Science Engineering Graduate with a solid foundation in software development, Full Stack development, and Web technologies. I aim to learn new technologies.

WORK EXPERIENCE

Data Analysis Using Python Intern

May 2023 – July 2023

Worked on Machine Learning models using python for analyzing and presenting the data for T20 matches. I analyze every match scores and store the data in data sets. The T20 cricket data analysis using python project focuses on analyzing historical T20 match data to extract meaningful insights about players, teams, and match performances.

Cyber Security Intern

May 2024 - July 2024

The Keylogger Using Detection project is designed to study how keyboard input events can be captured and logged at the operating system level. This project focuses on Keyboard event handling, system monitoring, and User activity tracking and security analysis

PROJECTS

A Strong Network Security Framework Utilizing a Dual Layer and Hybrid Model Integrated with Machine Learning

[Project Link](#)

Designed and implemented a robust network security framework using a dual-layer architecture and a hybrid model combining rule-based detection with machine learning techniques.

EDUCATION

2021 - 2025	Bachelor's Degree at MITS	(GPA: 7.12/10.0)
2019 - 2021	Class 12th BIEAP	(Marks: 683)
2018 - 2019	Class 10th BSEAP	(GPA: 8.7/10.0)

Certifications

- **CPDA** Certified **Python** Developer with license
- **SQL** (Hacker **Rank**)
- Cyber **Security** (**Simple Learn**)

SKILLS

- **Languages:** Advance Python, Java basics
- **Web Development:** HTML, CSS, JAVASCRIPT
- **Databases:** SQL
- **Tools:** Microsoft Excel, Github, Vs Code
